

KILN FORMED GLASS HEADED GOLF CLUB PUTTER

ABSTRACT OF THE DISCLOSURE

- 5 A strengthened triangular shaped glass putter head made by a specific shape dependent fusing and annealing process using 90 COE or 96 COE soda lime glass. The putter head has smooth surfaces or is patterned with individually colored bas-relief design decorations. The putter head may be colorless, single colored, multi-colored, or semi-transparent to opaque in appearance. The putter head is sufficiently strong to play a more rigorous putting-based golf game.
